## Tines

|    |                  |                       |                                                |   |  |
|----|------------------|-----------------------|------------------------------------------------|---|--|
| 10 | <b>R100-3626</b> | 100-3626,<br>108-9211 | Alloy Solid Tine - .750MT x<br>6.375L x .354OD | 3 |  |
|----|------------------|-----------------------|------------------------------------------------|---|--|

***Detail Description:** Alloy Solid Tines aerate without the work of cleaning up the mess of cores and debris left behind with conventional core aerating. R&R Solid Tines are manufactured from a special high-carbon steel bar and heat treated to RC45-48 in our own heat treatment facility. They are available in all standard sizes but are especially popular in the smaller diameters for aerating in the summer months to relieve the stress on greens by allowing water, air and nutrients to easily flow into the root zone. With the combination of small holes and no cores, play can be resumed immediately.:*

|    |                  |                       |                                                |   |  |

| 11 | <b>R108-9133</b> | 108-9133 | Alloy Hollow Tine - .750MT x 5.750L x .570OD | 3 |  |
|----|------------------|----------|----------------------------------------------|---|--|

*Detail Description: Like Standard Hollow Tines, this tine is also tubular and designed to remove a soil core, but they are constructed from a special high carbon alloy steel. The steel tubing is specially manufactured for R&R to achieve uniform hardness of RC45-48 throughout the tine for excellent wear and toughness. These tines are much tougher and resist bending in extremely hard or rocky soils and you can expect 3-4 times longer life than from the Standard Hollow Tines.:*

|    |                  |          |                                              |   |  |
