

Corona Forged Dualcut Bypass Pruner - 1in RCBP7100D

Details

The 1 in. Forged DualCUT Bypass Pruner is made for quick cuts with maximum leverage featuring a notched hook design with both a PowerZONE and a PrecisionZONE. The PowerZONE provides 20 percent more cutting power with a notched hook and blade located nearest the pivot point to hold branches up to 1 inch in place for maximum-leverage during cutting. The PrecisionZONE is ideal for quick cuts of smaller stems and branches. The full core metal handles provide strength and durability with shock-absorbing bumper grips for extreme user comfort. The spring system is located inside the body eliminating lost parts.

The patented DualCUT blade and notched hook designs provide both a PowerZONE and PrecisionZONE of cutting.

Precision made
M42 forged tool steel is a
forging process that
creates steel
inherently into Corona's
strongest, most durable
garden cutters tools.

The PowerZONE uses the area of the notched
hook and blade nearest the pivot point to
hold branches, up to a 1" diameter, in place
for maximum-leverage cutting.

- PowerZONE Area of Hook & Blade for Maximum-Leverage Cuts on Branches up to 1 in
- Right or Left Handed Activation with Centered Lock
- Comfortable Handle with Contoured Soft Grip
- PrecisionZONE Area of Hook & Blade for Quick, Repetitive Cuts on Stems and Smaller Branches
- Blade and Hook Design Delivers 20% More Cutting Power
- Internal Spring for No Lost Lost Parts or Clogging
- No Blade Crossover with Fully Forged Steel Construction for Strength
- Resharpenable Blade
