

Rain Bird Pesbr Reclaimed Water Electric Valve 24VAC Scrubber - 1" NPT

RGB37200

Details

Durable chlorine-resistant valves for reclaimed water irrigation applications. A true reclaimed water irrigation valve, able to handle chlorine and other chemicals found in reclaimed water systems. PESB-R Series valves offer long life and efficient, trouble-free performance - even in harsh reclaimed water applications. Constructed of heavy-duty, glass-filled nylon, these valves resist clogging and feature a patented scrubber to actively fight dirt, algae, and other particles from blocking the pilot flow.

Specifications

Manufacturer	Rain Bird
Box Quantity	10
Flow Rate	5 - 200 gpm
Holding Current	0.28 Amps
Input Voltage	24 VAC 50/60 Hz
Inrush Current	0.41 Amps
Maximum Pressure	15-200 psi
Package Quantity	1
