

Luberite Lid w/1/2 in/12mm Nozzle

RJ17025

Details

Eliminate fluid contamination and reduce machinery downtime. Durable, easy-to use hand-held polyethylene containers are ideal for dispensing and storing lubricant. Fully sealed to keep dirt and dust out and reduce dangerous and costly spills. The translucent body has graduated markings in English and metric. Features polyethylene lid with easy pour handle, leak-proof on/off switch for breather vent, twist-turn spout for high flow to controlled pour, Quick Fill Port, and Accessory Port for quick disconnect couplings. Spout directs liquids into tight places or a flexible extension hose can be added to reach awkward places. A visible "no mistake" Color I.D. System features 8 color-coded lid bands for content identification. Pump available for 5 Qt. container. Drums and lids sold separately.
