

Pyramid Yardage Marker - Solid Red

RP10-RB

Details

Pyramid Fairway Yardage Markers stand above the rest in design and durability. The pyramid design helps golfers quickly view yardage with easy-to-read distant numbers and brilliant UV protected colors. The durable uni-body design is available in a rainbow of colors and features a UV protected ABS honeycomb construction for years of commercial use. The 10-1/2" diameter marker compresses flat as the weight of a mower or cart pass and then springs back to shape when released. For best results, install markers in the center of fairways at 50 yard intervals. For the most visible applications, use color markers at each interval: Red (100), White (150), Blue (200) and Yellow (250). Color markers are available with or without numbers. For a more conservative look, install Green markers with White lettering in 50, 75, 100, 125, 150, 175, 200, 225 and 250 intervals.
